SUMMARY

Motivated and self-starting problem solver with a strong passion for code and design. I am also committed to lifelong learning and continuously improving my skills. With a positive and team-oriented attitude, I have excellent communication and organizational abilities.

WORK EXPERIENCE

Android Developer

Oasis Livestock LLC, Abu Dhabi

Jun 2023 - Present -

- Working on the Zabehaty App's development and resolving any issues.
- Overseeing the Play Store release process, which includes managing versions, creating release notes, and uploading the APK.
- Collaborating with the design team to create user-friendly and visually appealing interfaces.
- Breaking down projects into smaller tasks and defining milestones.
- Notably, the app has already achieved an impressive milestone of 50+ downloads.

Android Developer

PNC Solution - Appiskey, Karachi, Pakistan

Jan 2021 - May 2023

- Involved in full life cycle application development, which included requirements gathering, analysis, conceptual design, configuration, development, bug fixing, testing, and publishing Apps.
- Enhanced App performance by developing dynamic UI for the product team and used Coroutines and Android Jetpack libraries.
- Boosted project development by collaborating with cross-functional teams to efficiently design and deliver new features.
- Improved the business logic and development process by using MVVM clean architecture.
- Optimized project development by utilizing Git for version control, collaboration, code review, backup, recovery, and experimentation.

Technology Stack: Kotlin, Coroutines, Dagger-Hilt, MVVM clean architecture, Git, Retrofit, Glide, FCM Notification, Exoplayer, AndroidPdfViewer, CircleImageView, Postman, Jira, Agile.

Android Developer

Symmetry Group, Karachi, Pakistan

Jun 2019 - Dec 2020

- Designed and build advanced applications for the Android platform.
- Worked with outside data sources and APIs.
- Worked on bug fixing and application performance improvement.
- Review and optimize the code to identify and fix any performance issues, such as long-running operations or inefficient algorithms.
- Used efficient layout designs that minimize the number of views and complexity of the view hierarchy.
- Used techniques such as SQLite or SharedPreferences to minimize the time spent reading and writing data. Conceptualizing and formulating apps that are suitable for use on all types of Android devices.

Technology Stack: Java, Kotlin, MVP architecture, Git, Retrofit, Glide, FCM Notification, Google Maps APIs, Firebase Services.

EDUCATION

BS (Computer Science)

University of Sindh, Pakistan

Jan 2017 - Dec 2020

MOST PROUD OF

GDSC Lead

Google Developer Student Clubs - University of Sindh. Year (08/2020 - 08/2021)

Founder

Hyderabad Student Developer Community (HSDC). Year (01/2020 - 12/2021)
